Workshop Overview

This learnshop will introduce participants to student response systems used in higher education. More specifically participants will get an overview of the system called iClicker available through the CTL at Mesa Community College.

Outcomes

After attending this workshop participants shall be able to:

- Explain the use of student response systems in the classroom
- Describe common tasks performed with student response systems
- Recognize the process for using iClickers
- Create a question & start the polling process
- Identify possible uses in their own teaching
- Schedule use for iClickers

Other Resources

For a bibliography on student response system articles by discipline visit:
